

# HTML Color

There are different ways, we can use to provide color to text, background color etc

- Color Name like Yellow, green, gray, red, gold etc
- `rgb(255, 99, 71)`
- `#ff6347`
- `hsl(9, 100%, 64%)`
- `rgba(255, 99, 71, 0.5)`
- `hsla(9, 100%, 64%, 0.5)`

In `rgba` and `hsla`, 'a' means Alpha that is used to set transparency

# HTML Color

## Examples:

<h1 style="background-color:rgb(255, 99, 71);">...</h1>

<h1 style="background-color:#ff6347;">...</h1>

<h1 style="background-color:hsl(9, 100%, 64%);">...</h1>

<h1 style="background-color:rgba(255, 99, 71, 0.5);">...</h1>

<h1 style="background-color:hsla(9, 100%, 64%, 0.5);">...</h1>
